

CITY OF
PRINCE GEORGE

JOB DESCRIPTION

<u>JOB TITLE:</u>	WASTEWATER TECHNICIAN CERTIFIED (Progressive)	<u>SCHEDULE:</u>	C
<u>DIVISION:</u>	UTILITIES DIVISION	<u>PAYGRADE:</u>	8 - 13
<u>DEPARTMENT:</u>	CIVIC OPERATIONS		

JOB SUMMARY:

Wastewater Technicians are responsible for work on the City's storm/sewer lift station and treatment facility infrastructure which involves equipment operation, inspecting and servicing parts and equipment, completing preventative maintenance measures as scheduled, maintaining equipment plant systems records, and maintaining building and grounds. Incumbents may progress to higher level technician positions as the requisite certification and experience is obtained. The work is similar at all cert levels but as incumbents achieve higher levels of EOCP certification, the work becomes increasingly complex and independent judgement and problem solving is required. Performs related duties. These positions are subject to Schedule D hours.

MAJOR RESPONSIBILITIES:

LEVEL ONE TECHNICIAN:

Under the general supervision of the Wastewater Technician Foreman, performs repair and maintenance functions to Wastewater facilities by:

- reading and recording information from motors, flow recorders, pressure/vacuum gauges and any other equipment, as required;
- utilizing and adjusting computerized maintenance systems;
- operating equipment including, but not limited to, bar screens, grit removal apparatus, pumps, air and gas blowers, mixers, and valves;
- ensuring proper operation of trickling filters, solids contact tanks and primary and secondary clarifiers;
- operating turbines, generators and related equipment;
- carrying out equipment servicing and preventative maintenance work as outlined in work schedules, and involving oiling, greasing and minor repairs, and reporting major repair work to the supervisor;
- assisting in major repairs and maintenance and installation of equipment as directed;
- maintaining the appearance of buildings and grounds in a neat and tidy order;
- cleaning out the rock pit, screens, grit tanks, solids contact tanks, clarifiers, anaerobic digesters, chlorine contact tanks, wet-wells and sumps as required;
- operating scum skimmer systems, anaerobic digesters, process and building heating systems, and ventilation systems;

- operating dewatering equipment, biosolids dump truck and screenings dump truck as required;
- monitoring SCADA and making process changes as required;
- conducting chemical analysis tests in the laboratory on wastewater and water;
- collecting wastewater samples for chemical and bacteriological analysis;
- inspecting treatment process and undertaking corrective action on treatment facilities;
- attending storm/sewer lift stations and wastewater treatment facilities on emergency call-outs when required;
- performing confined space entry;
- assisting higher level technicians as directed;
- providing lectures and tours of operations and processes as approved by the supervisor
- performing other related duties as required.

Performs physical activities such as:

- lifting and carrying objects weighing up to 50 lbs./23 kg.;
- confined space
- walking, standing, bending, lifting, and carrying for extended periods of time;
- using common hand–tools needed for routine maintenance and repair tasks for extended periods of time;
- working outside in all weather conditions;
- being exposed to noxious odors, raw and/or treated sewage, and dirty conditions.
