2 #3331 Parking Lot Renewal								
	This program will focus on reinvesting in civic building parking lots such as the Civic Centre and arenas, as well as parking lots in parks and at the cemetery. The City owns over 180,000 m2 of paved parking lots that have an expected life of 34 years, some of which are at the end of their lives. Based on the recent condition assessment of these parking lots, there are 9 lots totaling 34,000 m2 that are in poor to very poor condition. 2023 project will be located at Exhibition grounds and CN Centre to rehabilitate the existing asphalt surface parking and event space areas and interior roadway network due to their deteriorated condition to provide new service life and to improve the level of service for the facility users.

Parks								
23	#0311 Tree Planting Greening the City							
	Plant new and replacement trees in parks, boulevards, medians, and in the downtown core to support objectives relating to beautification and a healthy urban forest. Priority areas include parks or playground areas in need of shade trees, boulevard areas with limited tree canopies, and downtown improvement projects.							
			Climate Action Reserve	50	50	50	50	50
		250	Project Totals:	50	50	50	50	50
24	#0382 Nature Park Improvements							
	This program would see upgrades to aging park infrastructure throughout the City's Nature Parks to support community demands and the policy direction in the 2017 Park Strategy which identified Nature Parks as a high priority for strategic investment. Prince George residents increasingly visit our nature parks and our community has seen a steady increase in visits and have heard how important these areas are to our residents for physical and mental health. Planned 2023 project includes security gates to restrict public access along the Heritage River Trail & Cottonwood Island. Proper gates will assist Park staff when closing off public access to park areas during spring flooding and other emergencies. Proper security gates to control public access along key riverfront trails are critical to the safety, maintenance and proper management of these key locations.

25	#1097 Trails Rehabilitation							
	Rehabilitate City-maintained trails located in various parks and transportation corridors, which are identified in the 2017 Park Strategy as a high priority of strategic investment to meet community demands for trail access. Priority work in 2023 will include trail rehabilitation along Tyner Trail.

26	#1378 Playground Replacement Program							
	This program utilizes the results of a Playground Audit completed to determine the compliancy and risk of the City's 65 playgrounds to the Canadian Standards Association (CSA) standards. The audit results informed the playground priorities identified through the 2016 Park Strategy developed through community feedback. The playground priorities consider a variety of factors including community need and demand, land use, playground distribution, provisional standards, condition assessments and the health of area children to determine reinvestment needs and surplus sites. This program also allows for removal of playgrounds in low priority areas. The priority order for playground removal and replacement has been determined by the Playground Audit Risk Assessment as well as the direction provided by the Parks Strategy. Priority in 2023 will be the replacement of the play structure at Moosehart Park that was destroyed by vandalism/fire in October of 2022.

27	#1385	Park Washroom Refurbishment							
		Replace the public washroom facilities at parks throughout the City. The Parks Division currently maintains these public washroom facilities that are failing and in disrepair. New facilities will be designed using up to date CPTED (crime prevention through environmental design) principles while meeting current accessibility standards, BC building codes, and public expectations. Future works proposed include washrooms at Lheidli Tenekeh Memorial Park, Carrie Jane Gray Park and Gyro Park.

28	#3332	Ball Diamond and Sport Field Renewal							
		This multi-year project would see reinvestment in ball diamonds and sport fields based on the Ball Diamond and Sport Field Strategy. Most of these outdoor recreation facilities were developed in the 1970s and 1980s by local sports groups and are in need of refurbishment based on a recent facility assessment. These amenities are proposed to include new fencing/backstop and field improvements at sport fields within both Carrie Jane Gray and Freeman Park and will prepare the City of Prince George to host the BC Summer Games and tournaments providing economic benefits to the community.

29	#3391	Gravel Parking Lot Renewal							
			Investment in park facilities is a key focus area in the 2018 Park Strategy and includes appropriate access to these park facilities. This multi-year program is to update existing gravel parking lots at Park facilities. Work to include additional granular surfacing, grading, proper drainage, signage, concrete traffic barriers and dust control. Increased focus on increasingly popular site such as Ginter's, Shane Lake, Moore's Meadow, Fairburn Park and Blackburn will ensure proper management of these site for the community to continue to access and enjoy.

41	#3381	East Purdue Road Hard Surfacing							
		Paving the gravel section of East Purdue Road between Sykes Road East and Haldi Road due to an increase in traffic following the completion of Highway 16 widening project. This provincial project eliminated the right turn off of Haldi Rd for vehicles to be able to travel west causing East Purdue Rd the only available route for vehicles to maneuver west from the south side of Highway 16. This has caused an increase in traffic and the volumes for service requests for maintenance such as grading and dust control. Paving East Purdue, between Sykes Road East to Haldi Road, would be a betterment for the community and operational needs of City of Prince George roads crews.

45	#3385	Terminal Blvd CN Rail Crossing Modification							
Modification of the existing CN Rail warning system on Terminal Blvd East to install additional sets of lights (beacons) in accordance with Transport Canada's Grade Crossing Regulations Article 68, and Grade Crossings Standards Article 13. Following a CN Rail inspection of the crossing located on Terminal Blvd East at the mile point 0.49 of the subdivision Prince George, CN noted non-conformities according to the Transport Canada's Grade Crossing Regulations article 68. In order to meet the regulations, CN proposes modifications to the existing warning system by adding additional sets of lights. For financial assistance of this project, CN Rail is submitting an application to Transport Canada's Railway Safety Improvement Program (RSIP) for 2023-24. As provided by CN Rail, the project costs are estimated at \$65,764. The City of Prince George will be responsible for 50% of the actual costs without the RSIP grant, and 25% of the actual costs with the RSIP grant. The works will be completed by CN Rail.

						2024	2025	2026	2027
60	#3328	Sanitary Lagoon Re-Routing							
			The first project will focus on Western Acres. Installation of a new liftstation to replace the existing liftstation at Western Acres, which will pump effluent for the full 301 lot buildout to the City of Prince George sanitary system and connect to a manhole located at the intersection of Leland Road and Bunce Road. Effluent from Western Acres will be treated at the City of Prince George Wastewater Treatment Centre at Lansdowne Road. The existing lagoon cells 1, 2 and 3; and the engineered wetland, would be taken offline, and the existing piping abandoned. Discharge restrictions primarily limit existing wastewater treatment capability to Hiller Creek. Treated and seasonally stored effluent cannot be discharged as designed to Hiller Creek since the creek's low or nonexistent flow does not allow for adequate dilution as required by the permit. Future projects will include Danson and BCR Lagoons. The rationale for this work is because of new federal discharge regulations.

67	#3102	New Water Mains							
		Construct new water mains. New water mains are constructed based on the recommendations and requirements as per the Water Service Network Plan 2014 and technical analysis. This capital amount allows for the capital project portion of planning (i.e. predesign, concept, design) as well as the engineering and construction of new water mains. The new water mains program will increase fire flow and redundancy in the City's network.							
				Water Reserve	700	800	800	1,000	1,000
			4,300	Project Totals:	700	800	800	1,000	1,000
68	#3184	New Water Facilities							
		Construct new vertical water assets and components (water supply pump stations, water booster pumping stations, pressure reducing valve stations, and water storage) as per the recommendations and requirements in the Water Service Network Plan 2014. This capital amount allows for the capital project portion of planning (i.e. predesign, concept, design) as well as the engineering and construction of new vertical assets. The first top priority is designing and building the Boundary Road Reservoir.							
				Water Reserve	0	4,000	100	100	100
			4,300	Project Totals:	0	4,000	100	100	100
69	#3185	Water Facilities Renewal							
		The renewal of water facilities' vertical water assets and components (water supply pump stations, water booster pumping stations, pressure reducing valve stations, and water storage) including technological and health and safety needs.

1-General Fund								
Aquatics								
1	#3274 AQC-Replace Cardio Equipment							
	Replace the cardio equipment in the Aquatic Centre pool Gym which is at or nearing the end of its 7-10-year service life.							
			Unfunded Future Projects	0	175	0	0	0
		175	Project Totals:	0	175	0	0	0
2	#3376 AQC - Bulkhead Replacement							
	Installing 2 bulkheads (one with a screen) which span the width of a main pool at the Aquatic Centre, creating a movable bridge to divide a larger single activity pool into a multiple activity pool. We will have the ability to reposition the bulkheads and accommodate competition courses or to host two aquatic events simultaneously. The bulkhead separates the shallow water (movable floor) from the deep which allows greater pool use option for services being offered for the general public and rental/sport groups.

10	#1189 Off Leash Areas							
	This project includes the implementation of new off leash areas and fenced dog parks throughout the community as supported by policy direction within the 2011 Proposed Off Leash Strategies report and 2017 Park Strategy. Existing park facilities such as underutilized ball diamonds would be repurposed for off leash use. Priority locations and their improvements identified will continue to be reviewed and assessed in combination with community needs to address dog parks as key gathering spots. Project work would include signage, waste receptacles, fencing and other site improvements that would be required to support off leash use.

PG Events Group									
	19	#1290 Mobile Stage							
		Purchase an all-aluminum mobile staging system with full hydraulics in order to enhance outdoor festivals in Prince George and support community celebrations, such as large-scale sporting events. The StageLine SL 100 Mobile Stage is the industry standard with a stage floor of 24'x 20' and a band shell of 24' x 12'. This unit can be towed with a standard pickup truck and only takes 2 people ½ hour to set up. This project supports Council's key corporate priorities and the myPG Community Goals of programming downtown civic facilities and spaces, fostering civic pride, collaborating, and having a healthy, vibrant community. Currently the City is spending up to \$20,000 per year on stage rentals for our outdoor festival events.

				Project Totals:	0	0	0	430	

This project identifies the recommended average annual reinvestment (AAR) for replacement and renewal of the City's aging storm drainage network, including linear and vertical assets. The dollar amounts shown for this project represent the full calculated AAR amounts for this asset type, and do not reduce the figure for funded capital projects in the capital plan of this asset type.

Construction of a storm retention pond in the Aberdeen area. Will be required when the Crown land north of Aberdeen Rd is developed.

Design and construct a storm water retention pond, which is required on Noranda Rd to reduce the peak flows to the storm sewer trunk. The McMillan Creek Watershed is the largest watershed in Prince George and has high riparian value, including salmon and resident fisheries. This watershed also receives large volumes of the storm water south of Monterey Rd. This pond will assist in meeting water quality criteria.

				Project Totals:	0	0	0	2,000	0

Install a 350m, 450mm diameter storm sewer with catch basins and asphalt swales to provide storm runoff management where no ditching or drainage channels exist. Ditch and sub-surface recharge options were explored, but would not be effective or feasible. Over the last decade the City has received several reports of flooding from the road onto properties situated on the south side of Meyer that are lower than the road elevation. The reports have been frequent during regular rain fall events, spring runoff and winter thaws. Efforts to address the situation by Public Works during events have not been effective.

Install 1250m trunk storm sewer from the University Heights Development to Range Rd. Project required for new development and will be included in the DCC calculation project list (will be DCC funded). Involves the construction of detention ponds, which must be identified to set aside lands for construction as planning proceeds. Significant slopes, unstable soil types, and possible bedrock are project constraints. Connection at Range Rd may be insufficiently sized and will be confirmed at the pre-design stage.

Fund	#	Project	Cost	Funding Source	2023	in thousands (000)			
						2024	2025	2026	2027
49	#	#1117 Storm Sewer Improvements - Ferry to Range							
		Upgrade existing storm sewer to facilitate installation of a perforated piping recharge system to accommodate increased storm water runoff volumes from new development (University Heights, Recplace, Foothills Blvd Extension, and future redevelopment). Includes diversion chambers, replacement of existing storm sewer, and installation of new perforated piping to mitigate flooding and maintain the existing volume of discharge to Lansdowne Creek and the Fraser River. The project has high environmental value.

			675	Project Totals:	0	75	600	0	0
50	#	#1439 Winnipeg St - Storm Drainage Treatment							
		Complete construction to divert storm water from the underground Winnipeg St storm system through an above ground treatment channel which parallels Winnipeg St from 15th Ave overpass to Carney St. High sedimentation and high concentrations of hydrocarbons found in the previous Winnipeg St storm system rehabilitation project revealed the need for an alternate treatment/catchment area. Diverted sections may either be abandoned due to high siltation/contamination or used for overflow purposes during major storm events. The above ground treatment channel will be easier to maintain and offer treatment options not possible with an underground structure.

71	#3186	Repurpose PW601/Decommission PW602							
			Repurpose PW601 to supply water to both Pressure Zone 1 (PW803) and Pressure Zones 8, 9 and 13 (PW810). Under this option, PW602 is decommissioned, PW605 remains unchanged, and the required capacity from PW660 will reduce by the demand from Pressure Zones 8, 9 and 13. An 800mm diameter HDPE pipe will be slip-lined inside the existing water main from PW601 for approximately 1.5km to a termination point on the north side of the Nechako River. From this termination point, the 800mm HDPE pipe would be conventionally trenched to a new pump station at the existing PW608 location. In this pump station, a 750mm stainless steel header will feed a 600mm takeoff to Pressure Zone 1. A 300mm stainless steel takeoff will supply booster pumps to feed Pressure Zones 8, 9 and 13 via the water storage reservoir at PW810.

			3,000	Project Totals:	0	3,000	0	0	0
21	#0270	Winter Traction/Salt Facility							
		Municipal winter traction materials and existing infrastructure are currently located at the 18th Ave Public Works Yard. The current storage areas do not meet environmental best practices and consolidation would improve efficiencies and storage capacity. Supports myPG environmental goals. The design is now completed. The new site will accommodate a municipal salt, brine, and winter traction materials storage facility. Structures would be placed on impermeable surfaces with containment and access/egress to the site would be improved to increase efficiencies. Project would align with City's Salt Management Plan and Environment Canada Regulations and Code of Practice. Increased storage would be obtained to house an annual supply of material. A fleet vehicle wash facility will be included. This wash facility will allow the cleansing of fleet vehicles and equipment removing the road salts in a contained environment.

32	#1209	Tyner Blvd Bus Pullouts							
		Develop two new bus pullouts along Tyner Blvd at the intersection of the University Heights Dr residential subdivision. The bus pullouts will be developed to meet the Transportation Association of Canada's national guidelines as well as the BC Transit Infrastructure Design Guidelines. With the growth of the residential subdivision there are potentially more riders on the local transit service. This Route #16 UNBC/College Heights is identified in the BC Transit Futures plan as becoming a frequent transit route with bus pullouts between 300-500m along this corridor. This first location will serve the greatest number of residents and provide a safe loading and off-loading with little or no disruption to the through traffic.							
			375	Unfunded Future Projects	50	325	0	0	0

55 #3121 2nd Ave Angle Parking and Two-Way Conversion

Implement angled parking from Vancouver St to Queensway and implement two-way traffic from Queensway to Victoria St along 2nd Ave. Implementation involves "bulb-outs" at the intersections, including the installation of concrete curb and gutters, catch basins, planters, and paving stones. The works will reduce 2nd Ave to two lanes, reduce the pedestrian crossing distance, indirectly reduce the average travel speed, and potentially increase on-street parking by approximately 20-25%.

					2028	2029	2030	2031	2032
78	#1391	Construction Tools and Equipment							
		Purchase tools and equipment needed for utility operations to be able to complete all of the ongoing and upcoming construction projects.							
			125	Unfunded Future Projects	25	25	25	25	25
				Project Totals:	25	25	25	25	25
79	#3101	Water Main Replacements							
		Construct water main replacements. Water main replacements are required as per the Water Service Network Plan 2014 and technical analysis. This capital amount allows for the capital project portion of planning (i.e. predesign, concept, design) as well as the engineering and construction of water main replacements. The program proactively replaces water mains to reduce the risk of water main breaks.							
				Unfunded Future Projects	5,200	5,200	5,200	5,200	5,200
			26,000	Project Totals:	5,200	5,200	5,200	5,200	5,200
80	#3102	New Water Mains							
		Construct new water mains. New water mains are constructed based on the recommendations and requirements as per the Water Service Network Plan 2014 and technical analysis. This capital amount allows for the capital project portion of planning (i.e. predesign, concept, design) as well as the engineering and construction of new water mains. The new water mains program will increase fire flow and redundancy in the City's network.

					2028	2029	2030	2031	2032
81	#3184	New Water Facilities							
		Construct new vertical water assets and components (water supply pump stations, water booster pumping stations, pressure reducing valve stations, and water storage) as per the recommendations and requirements in the Water Service Network Plan 2014. This capital amount allows for the capital project portion of planning (i.e. redesign, concept, design) as well as the engineering and construction of new vertical assets. The first top priority is designing and building the Boundary Road Reservoir.							
				Unfunded Future Projects	100	100	100	100	100
			500	Project Totals:	100	100	100	100	100
82	#3185	Water Facilities Renewal							
		The renewal of water facilities' vertical water assets and components (water supply pump stations, water booster pumping stations, pressure reducing valve stations, and water storage) including technological and health and safety needs.							
				Unfunded Future Projects	600	600	600	600	600
			3,000	Project Totals:	600	600	600	600	600
83	#3284	Valves, Service Connections, and Fire Hydrants Renewal							
		Replace non-operable valves, service connections, and fire hydrants.

84	#3293 Preparing Water Infrastructure							
	Inspect and investigate the underground water infrastructure prior to paving. Tasks such as leak detection, hydrant maintenance, valve inspections, and location mapping are necessary in order to identify the required repairs. Master plans and condition assessments have identified that much of the City's water infrastructure is aging, supporting the need for investigations and renewal work to be completed prior to road rehabilitation. These tasks are critical in helping the City with early identification of potential issues, to ensure the delivery of high quality potable water, and to reduce the potential of having to destroy new pavement to complete repairs.							
		750	Unfunded Future Projects	150	150	150	150	150
			Project Totals:	150	150	150	150	150
85	#3298 Pump Station PW614 Replacement							
	Construct a new pump station to meet current and future water supply needs for the Blackburn area. The station will be designed to meet fire flow needs of the area.							
		1,600	Unfunded Future Projects	0	0	100	1,100	400
			Project Totals:	0	0	100	1,100	400
86	#3330 Water Facility Upgrade							
	Upgrade existing water facilities. All the water facilities are aging with major components being past life expectancy. New equipment is more energy efficient and more reliable, resulting in less downtime on equipment, reduced breakdowns, and reduced critical failures. Addition of new components or technology can increase efficiency and reliability, improving the robustness of the system.
